CONTENTS

Volume 30, 1963

ABDUL-HALIM, N. AND AL-SALAM, W. A. Double Euler transformations of certain hypergeometric functions 51

ALFORD, W. R. AND BALL, B. J. Some almost polyhedral wild arcs 33

AL-SALAM, W. A. AND ABDUL-HALIM, N. Double Euler transformations of certain hypergeometric functions 51

ANDERSON, D. R. AND STIFFLER, J. J. Lower bounds for the maximum moduli of certain classes of trigonometric sums 171

APPLING, WILLIAM D. L. Infinite series and nonnegative-valued interval functions 107

ARONSON, D. G. The stability of finite difference approximations to second order linear parabolic differential equations 117

AUSLANDER, JOSEPH. Endomorphisms of minimal sets 605

BALL, B. J. AND ALFORD, W. R. Some almost polyhedral wild arcs 33

BERGMAN, STEFAN. Integral operators in the study of an algebra and of a coefficient problem in the theory of three-dimensional harmonic functions 447

BRAHANA, THOMAS R. Embedding a regular neighborhood of the singular locus of a 2-dimensional polyhedron in E^3 215

BRIGGS, W. E. Prime-like sequences generated by a sieve process 297

BROWDER, FELIX E. The solvability of non-linear functional equations .. 557

CANNON, J. R. Determination of an unknown coefficient in a parabolic differential equation 313

CANTRELL, J. C. Almost locally polyhedral 2-spheres in S^3 249

CARGO, G. T. The segmental variation of Blaschke products 143

CARLITZ, L. A problem in partitions 203

CARLITZ, L. Simultaneous representations in quadratic and linear forms over $GF[q, x]$ 259

CARLITZ, L. Some arithmetic properties of a special sequence of polynomials in the Gaussian field 15

CARLITZ, L. Some generating functions 191

CATER, S. Algebras on bounded functions in L_p 595

CATER, S. Structure theorems for certain operator algebras 567

CEDER, JACK G. Partitions of Euclidean spaces into dense, L_n-connected sets 367

CHURCH, P. T. AND HEMMINGSEN, E. Light open maps on n-manifolds, III 379

CLAY, JESSE PAUL. Variations on equicontinuity 423

CROWELL, R. H. The group G'/G'' of a knot group G 349

CROWELL, R. H. AND TROTTER, H. F. A class of pretzel knots 373

DARST, R. B. The Lebesgue decomposition 553

DE LEEUW, K. AND MIRKIL, H. Rotation-invariant algebras on the n-sphere 667

DOSS, RAOUF. The integral of a generalized almost periodic function ... 39

DUDA, EDWIN. Brouwer property spaces 647

DUREN, P. L. Invariant subspaces of tridiagonal operators 239

EDWARDS, C. H. JR. Cartesian factorization of compact 3- and 4-manifolds 355

EFFROS, EDWARD G. Order ideals in a C^*-algebra and its dual 391

EVANS, TREVOR. Abstract mean values 331

FULLERTON, R. E. The Cesari-Cavalieri area of a surface 151

GANELIUS, T. The zeros of the partial sums of power series 533

GILBERT, RICHARD C. AND KRAMER, VERNON A. Trace formulas for a perturbed operator 275

GLICKSBERG, I. AND WERMER, J. Measures orthogonal to a Dirichlet algebra 661

GRÄTZER, GEORGE. A generalization of Stone's representation theorem for Boolean algebras 469

HALPERIN, ISRAEL. Interlocking dilations 475

HEDSTROM, G. W. AND KOREVAAR, J. The zeros of the partial sums of certain small entire functions 519

HELLERSTEIN, S. AND KOREVAAR, J. Limits of entire functions whose growth and zeros are restricted 221

HEMMINGSEN, E. AND CHURCH, P. T. Light open maps on n-manifolds, III 379

HIRSCHMAN, I. I. JR. Laguerre transforms 495

HODEL, RICHARD E. Open functions and dimension 461

JENNER, W. E. Zeta functions of non-maximal orders in rational semi-simple algebras 541

JOHNSON, R. D. A note on uniformly locally connected open sets 413

KASSIMATIS, C. The integration of the generalized derivative 101

KOREVAAR, J. AND HEDSTROM, G. W. The zeros of the partial sums of certain small entire functions 519

KOREVAAR, J. AND HELLERSTEIN, S. Limits of entire functions whose growth and zeros are restricted 221

KORFHAGE, ROBERT R. AND LEVINE, JACK. Automorphisms of Abelian groups induced by involutory matrices, modulo $p > 2$ 161

KRALL, H. L. AND SHEFFER, I. M. Some solution-preserving operators for a partial differential equation 615

KRAMER, VERNON A. AND GILBERT, RICHARD C. Trace formulas for a perturbed operator 275

KWUN, KYUNG WHAN. An involution of the n-cell 443

LANFORD, OSCAR E., III. A note on a paper of Ginsburg 113

LARCHER, H. A necessary and sufficient condition for a discrete group of linear fractional transformations to be discontinuous 433

LEGER, G. Derivations of Lie algebras III 637

LEVIN, J. J. AND SHATZ, S. S. Riccati algebras 579

LEVINE, JACK AND KORFHAGE, ROBERT R. Automorphisms of Abelian groups induced by involutory matrices, modulo $p > 2$ 161

MEISTERS, G. H. AND OLECH, C. Locally one-to-one mappings and a classical theorem on schlicht functions 63

MIRKIL, H. AND DE LEEUW, K. Rotation-invariant algebras on the n-sphere 667

NEWMAN, D. J. AND SHAPIRO, HAROLD S. Some theorems on Čebyšev approximation 673

NEWMAN, M. AND SMART, J. R. Modulary groups of $t \times t$ matrices 253

OLECH, C. AND MEISTERS, G. H. Locally one-to-one mappings and a classical theorem on schlicht functions 63

O'Neil, Richard. Convolution operators and $L(p, q)$ spaces 129

Paul, E. W. Sums of series involving Bessel coefficients 95

Petrich, Mario. Some theorems concerning the dual of a commutative semigroup 25

Raimi, Ralph A. Invariant means and invariant matrix methods of summability 81

Rhode, Solon L., III. Persistent Markov chains constructed from transient chains 325

Rothman, Neal J. Algebraically irreducible semigroups 511

Rubel, L. A. A Fourier series method for entire functions 437

Rudin, Mary Ellen. Arcwise connected sets in the plane 363

Shapiro, Harold S. and Newman, D. J. Some theorems on Čebyšev approximation 673

Shatz, S. S. and Levin, J. J. Riccati algebras 579

Sheffer, I. M. and Krall, H. L. Some solution-preserving operators for a partial differential equation 615

Smart, J. R. and Newman, M. Modulary groups of $t \times t$ matrices 253

Spanier, E. Quasi-topologies 1

Stiffler, J. J. and Anderson, D. R. Lower bounds for the maximum moduli of certain classes of trigonometric sums 171

Sucheston, L. An ergodic application of almost convergent sequences 417

Tang, S. C. A definite integral 47

Traylor, D. Reginald. Normal, separable Moore spaces and normal Moore spaces 485

Trotter, H. F. and Crowell, R. H. A class of pretzel knots 373

Turrittin, H. L. Reducing the rank of ordinary differential equations 271

Walsh, J. L. A sequence of rational functions with application to approximation by bounded analytic functions 177

Wermer, J. and Glicksburg, I. Measures orthogonal to a Dirichlet algebra 661

Whiteman, Albert Leon. A theorem of Brewer on character sums 545

Zeitlin, David. The n-th derivative of a class of functions 229
